

Iloilo State University of Fisheries
Science and Technology
Tiwi, Barotac Nuevo
Iloilo

12th October 2023

To whom it may concern,

This is to confirm that the Quality Management System (QMS) of the Iloilo State College of Fisheries (ISCOF) now known as Iloilo State University of Fisheries Science and Technology (ISUFST), covers all the processes as stated in the scope of their QMS indicated in their Quality Manual.

All the processes for instruction, research and development, extension services and production activities, including the support to operations and facilities of the Main Tiwi Campus and its external campuses, have been audited as per the ISO 9001:2015 standard.

The scope of the management system of ISUFST has no permissible exclusion, which means that all clauses under ISO 9001:2015 standard are deemed applicable in the implementation of their QMS.

As part of our audit process, all the programs as per scope of the QMS are covered to ensure that the educational institutions are following the correct procedures.

If you require any further information, please don't hesitate to contact me.

Kind regards,

Jennie Hathway
Managing Director
